

Do you know your legislative obligations when planning a clearing sale?

Ideagen Plant Assessor has you covered.

Agriculture represents a disproportionate number of workplace incidents that result in injury or fatalities.

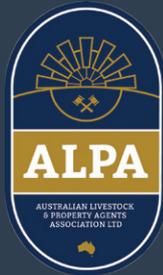

Ideagen Plant Assessor gives you the ability to provide detailed hazard information when selling machinery, ensuring the vendor is well-informed, improving your business integrity and enhancing safety across the industry. That means you can focus on maximising attendance and bidding at the sale, knowing that compliance and safety legislation is taken care of.

Take the stress out of clearing sales with:

-  The largest qualified and insured plant inspection team in Australia.
-  Plant risk assessments you can trust.
-  Reports generated on-site, straight away.
-  Friendly and professional end-to-end service.

Ideagen

Plant Assessor

Working in conjunction with an industry leader

With extensive machinery knowledge, working closely with Australian Livestock and Property Agent Association (ALPA), and coupled with an unrivalled machinery inspection platform, Plant Assessor leads the way in machinery safety compliance.

Ideagen Plant Assessor has worked with ALPA for many years to ensure agents have all the information and tools needed to assist their business and make life easier when conducting clearing sales.

The trusted name in safety and compliance

Trusted by Nutrien, Elders, Ray White Rural and hundreds of independent agents across Australia, Ideagen Plant Assessor is the go-to solution to manage WHS compliance and legal obligations when undertaking clearing sales.

What are your obligations

Vendors selling plant and equipment at clearing sales are considered “suppliers” under Australian Workplace Health & Safety Legislation.

The mandatory requirements when selling second hand plant at clearing sales are:

Work Health & Safety Regulation 2017 – Section 199 Supply of second hand plant – duties of supplier:

1. A supplier of second-hand plant must ensure, so far as is reasonably practicable, that any faults in the plant are identified.
2. A supplier of second-hand plant must ensure that the person to whom the plant is supplied is, before the plant is supplied, given written notice:
 - a. of the condition of the plant; and
 - b. of any faults identified under subsection (1); and
 - c. if appropriate, that the plant should not be used until the faults are rectified.

Victoria: Refer to Occupational Health and Safety Regulations 2017 – Regulation 90, Information to be given – used plant.

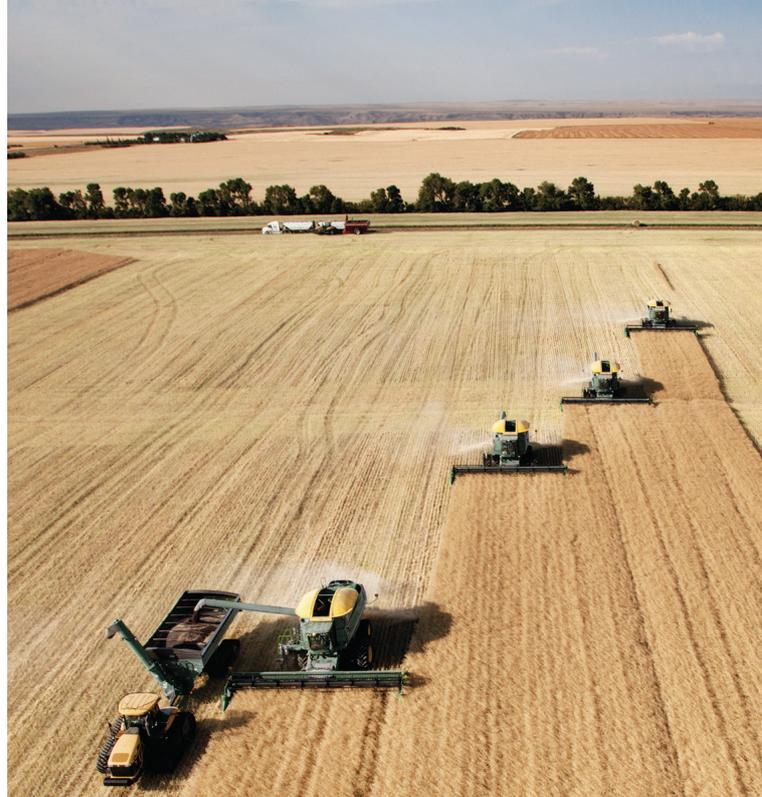

How to satisfy these obligations

Since 2004, Ideagen Plant Assessor has helped hundreds of agents and vendors meet their legislative obligations relating to the sale of plant & equipment at clearing sales.

The Process:

- 1 Agent or vendor sends a list of items for sale to Plant Assessor.
- 2 Plant Assessor analyse the list and identifies Plant v Non-Plant items for sale.
- 3 Plant Assessor provides a cost estimate to agent/vendor and receive instruction to proceed.
- 4 Plant Assessor attends the site and will:
 - a. Conduct plant inspections using our unique and unrivalled software for items requiring individual inspection.
 - b. Identify and label items to be sold as parts or scrap.
 - c. Provide generic safety information sheets for small plant not requiring individual inspection.
 - d. Supply both digital and hard copy reports ready to hand to purchaser.

What does it cost?

Ideagen Plant Assessor only charges a fee on plant items requiring individual inspection. All other aspects of the end-to-end service are included.

Where extensive travel is required, there may be a charge to cover travel costs.

Send us your sale list and we will provide you with a no obligation cost estimate.

WHAT OUR CUSTOMERS SAY

Langlands Hanlon

Langlands Hanlon never conduct a clearing sale without using Plant Assessor.

At Langlands Hanlon, we have involved Plant Assessor as part of our Clearing Sale process for the last five years with great success. Previously, the process was handled internally by staff with little knowledge of the implements being sold.

The team at Plant Assessor have a thorough knowledge of what they are doing and are easy to deal with.

The process is as simple as forwarding them a list of items, they tell us what needs assessing and supply a quote.

The team will come out and walk through the sale assessment of necessary items and can tell us - or the vendor - exactly the problems they are covering. We are left with the required forms for the day and feel assured that the clearing sale can operate smoothly.

Plant Assessor make clearing sale management so easy, we make it a compulsory part of our clearing sale process.

Cooper Byrnes, AWN Langlands Hanlon

Nutrien

Nutrien has relied on Plant Assessor to help them and their vendors since 2012.

Although clearing sales can be difficult, the last thing anyone wants is a legal issue. In recent years, more stock and station agents are starting to see the benefits of involving Plant Assessor to protect their clients.

Plant Assessor gives us the security of being covered with risk assessments – this is especially relevant for vendors, but also important for the Nutrien brand.

It's a modest investment for something that ensures everyone is 100 percent legally covered in the event that there is an incident involving a piece of equipment sold at a clearing sale.

For our business, using Plant Assessor is mandatory when we plan and conduct clearing sales. The cost benefit is obvious. It's efficient and affordable – why wouldn't you do it?

Brian Liston, Nutrien Rural Sales Manager
