## STEP 1

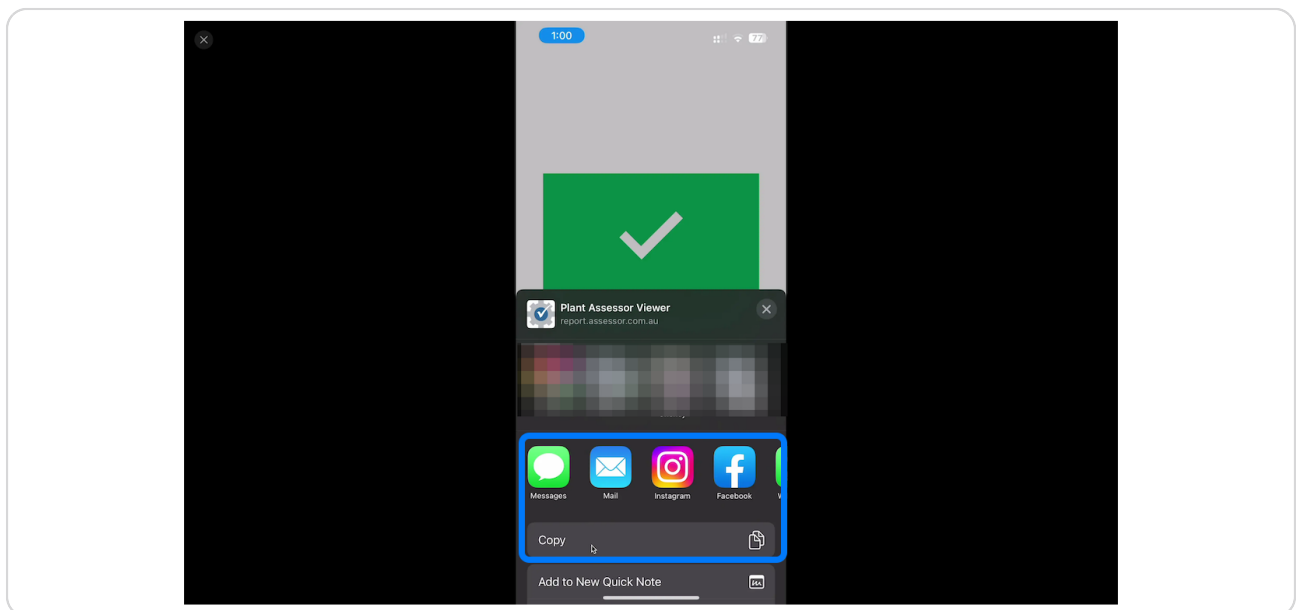

Once you have completed a pre start you can easily share the result from the operational status screen.

## STEP 2

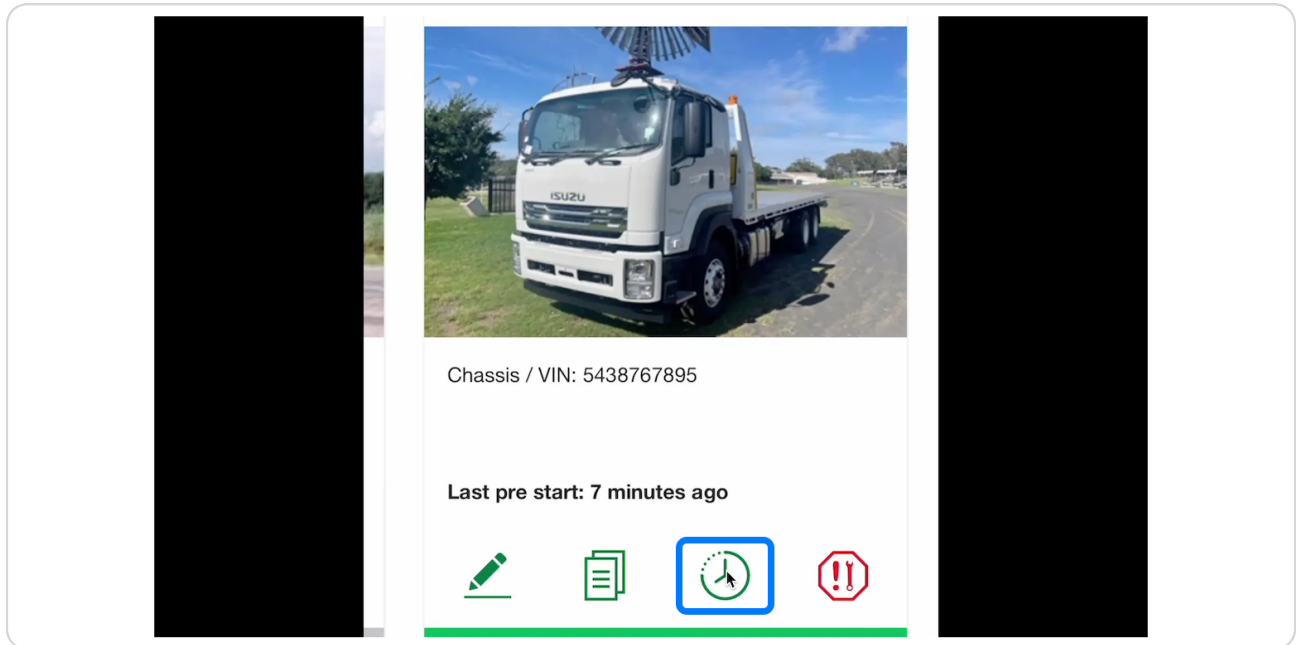

Select the method that you would like to share the report. Y

You can choose to share via SMS, email, slack, social media and more. Or you can simply copy the online URL.

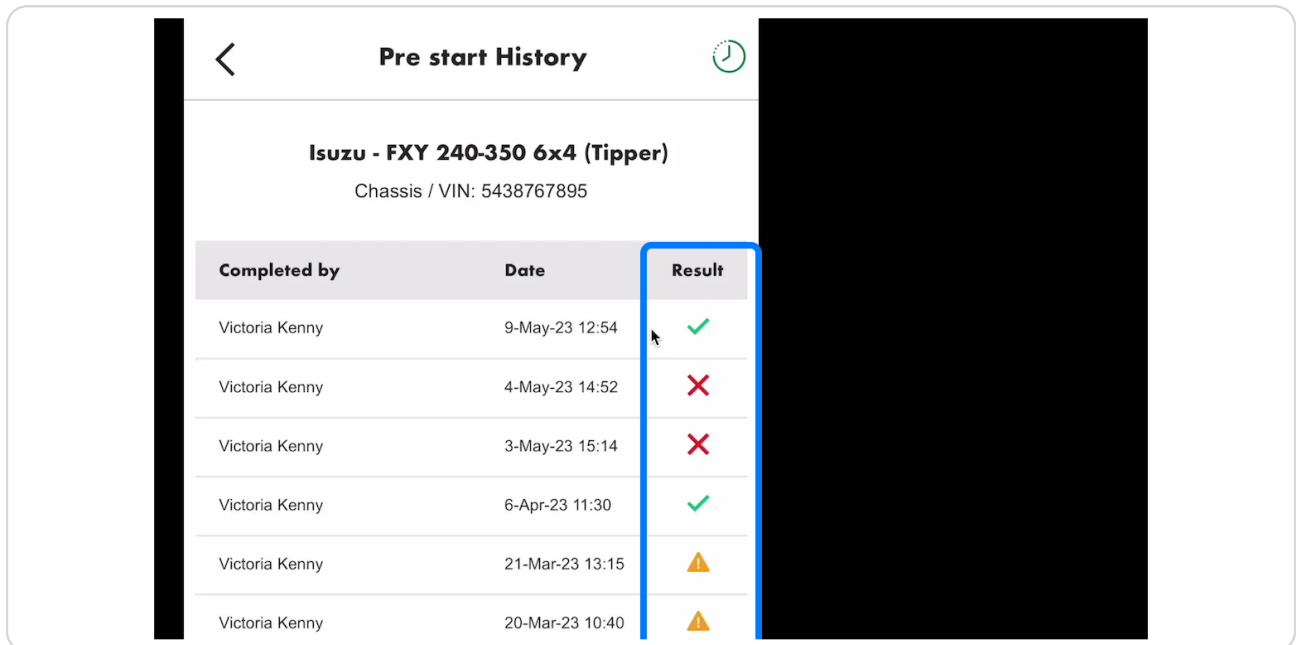

### STEP 3

To view pre start history, click the clock icon on the machine profile

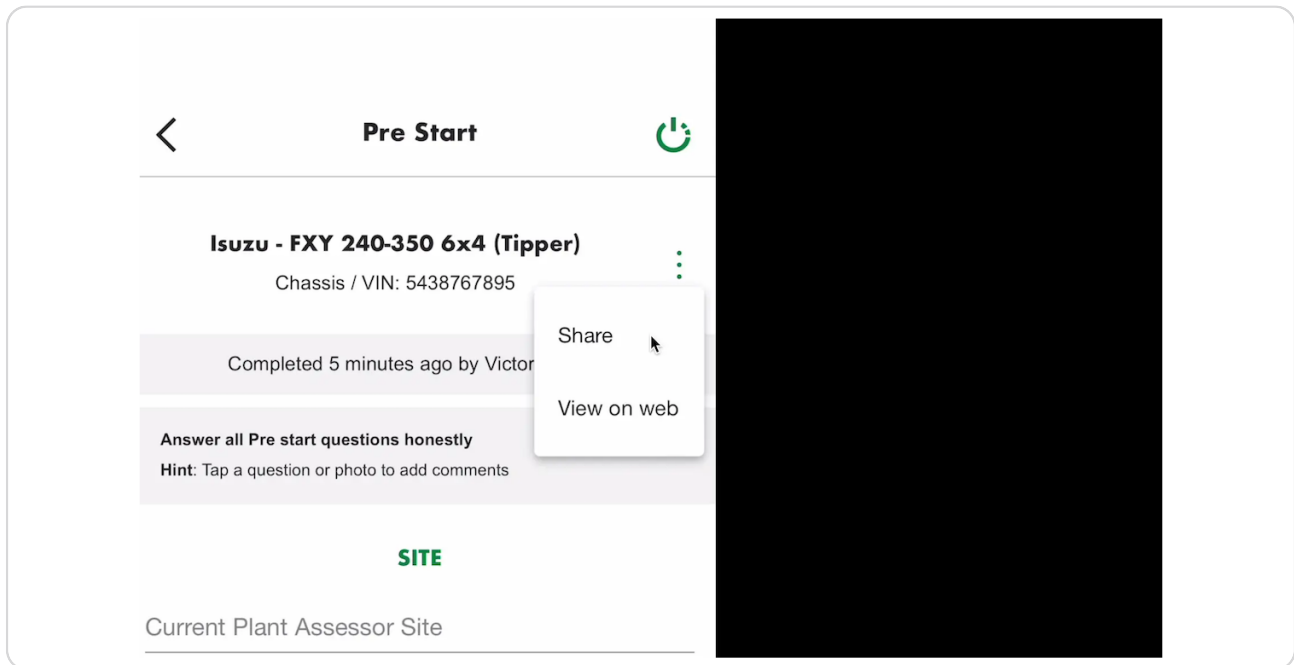

### STEP 4

Here you will find all pre starts conducted against this machine. To view in more detail simply click on the result icon

## STEP 5

To share the report, open the ellipsis menu at the top right and click share

## STEP 6

You will receive the same sharing options as the original pre start.
